Subject: Westlake Landfill

The EPA has held jurisdiction over the radioactive waste at the West Lake Landfill for too many years. In fact they made a decision in 2008 to cap the material in place but quickly abandoned that position. I understand that the Army Corp of Engineers has a program in place in north St Louis County to deal with radioactive waste that was part of the original material dumped at West Lake. I no longer have any confidence that the EPA can successfully deal with this problem in any sort of timely manner. For this reason, I would ask that this project be moved to the Army Corp of Engineers FUSRAP (Formerly Utilized Sites Remedial Action Program) for mitigation. I would like the material removed to a remote location but am willing to trust the FUSRAP to do what is safest and in the best interest of my family and community.
